EXTREME

鸿业 / 极致

Five thousand years of Chinese culture has left us countless valuable ideas, such as "When things go to extremes, they will turn back". Ordinary understanding needs to stop when it's just right. Only truly extraordinary people can understand that only "ants" can be "extreme". Whether it is the "foreign for China" of the eastern wise or the "luxury without Chinese elements" of the western artists, they all achieve a higher level of beauty and realm with the help of ideas and concepts from different angles.

The inspiration of Juedo's "Italian light luxury" is also originated here. It is rooted in western architectural aesthetics and art, and pays attention to the integration of oriental artistic conception design. While taking engineering science as the structural soul, Juedo highlights the aestheticism of nature. Comprehensive use of various technical and artistic means, and strive to achieve the ultimate visual comfort products, tactile sense of extreme pleasure. For the president, CEO and other minority elites tailor-made, and taste interlinked, emotional resonance understanding of the office space.

My manners

If you say going out and owning super sports cars is the spokesperson of your image. There is a series of office furniture "Rongyue" in the office, which is also a symbol of your identity. Inheriting the modern super running design and luxury craft level, it gives the office furniture "Rongyue" luxury soul.

Each "Rongyue" furniture is not only a model of fine workmanship, but also a masterpiece of modern technology. The advanced process technology ensures that each piece of furniture is incomparable.

The shape is refined but not boring, concise and abundant, the lines are smooth and not flat, soft and upright, the color is pure and not monotonous, bright and quiet, and their elegant and simple temperament even ignores its strong functional.
